

ENGINEERING DESIGN TECHNICIAN – Pole Line Design and CAD Team

Come work at a rapidly growing engineering firm that is staffed with industry experts, has great benefits, and prides itself on developing our people.

The Company

Planview Utility Services is an engineering firm that provides engineering design, sub-surface investigation and geographical information related services to telecommunication companies and electric utilities. Our workforce is a mix of veterans of the industry and youthful enthusiastic technical resources. We have pride in our collegial culture and host multiple regular corporate sponsored social activities. Our embrace of the use of technology plays a large part in our success.

The Position

We are currently seeking a qualified Engineering Design Technician for our growing Markham office. This candidate will be responsible for the production of computer aided drawings from concept to final design for underground infrastructure projects. In addition to drawing preparation, the candidate will also support the Project Manager with design tasks, site visits and meeting attendance.

Responsibilities

- Coordinate work activities with Project Managers / Coordinators, CAD Designers, Structures Designers, survey staff, Project Engineers;
- Import AutoCAD, TIF or other file formats and hard copy maps to create electronic base maps for road bases;
- Buried utility outside plant drawings in accordance with CSA and ESA (not initially);
- Aerial utility outside plant drawings in accordance with CSA and ESA;
- Aerial utility outside plant design in accordance with CSA and ESA
 - Wind and ice loading
 - Separations and clearances;
 - Detailed sag, tension, pole loading calculations;
- Work will be reviewed by a Professional Engineer;
- Participate in ongoing development of design standards and methodologies to further develop design and operational efficiencies;
- Interface directly with clients and other third-party resources to discuss, review and provide consultations for project requirements (not initially);
- Attend site meetings with clients or third parties as required at the direction of the Project Coordinator, including updating the PC clearly and in detail on the outcome of the meeting (not initially);
- Adhere to strict project budgets and client deliverable dates;
- Other activities as required.

Requirements

- Working experience with AutoCAD 2010 or later is **mandatory**;
- Strong problem solving and troubleshooting skills;
- Excellent written and oral communication skills;
- The ability to deal with multiple projects and conflicting deadlines and get along with people;
- Graduate from an accredited post secondary technical educational institution with minimum 2 years work experience;
- Familiar with Canadian industry codes, engineering practices, standards and construction methods.

Preferred Skills

- Experience with utility companies (i.e. electric, gas, telecom, fibre optic);
- Canadian consulting engineering work experience.

The Location

Planview Utility Services has 3 offices – Markham, London and Ottawa. Our clients and their projects are based throughout the province. ***The reporting office for this position is in Markham.***

Why You Should Apply

If you like to work as a part of a team, work alone, travel, contribute to infrastructure builds, work outdoors, receive competitive compensation, and be trained in current practices, then you should apply.

Note

Planview Utility Services Ltd is an Equal Opportunity Employer.

In accordance with the Accessibility for Ontarians with Disabilities Act, 2005 and the Ontario Human Rights Code, Planview Utility Services Ltd will provide accommodations to applicants with disabilities throughout the recruitment, selection and/or assessment process. If selected to participate in the recruitment, selection and/or assessment process, please inform Human Resources staff of the nature of any accommodation(s) that you may require.
