

Project Coordinator

Come work at a rapidly growing engineering firm that is staffed with industry experts, has great benefits, and prides itself on developing our people.

The Company

Planview Utility Services Ltd is an engineering firm that provides engineering design, sub-surface investigation and geographical information related services to telecommunication companies and electric utilities. Our workforce is a mix of veterans of the industry and youthful enthusiastic technical resources. We have pride in our collegial culture and host multiple regular corporate sponsored social activities. Our embrace of the use of technology plays a large part in our success.

The Position

We are currently seeking a qualified Project Coordinator / Telecom Designer. This candidate will be responsible for the overall project health, quality and deliverable of client projects from concept to final design for aerial, underground. This individual will work closely with clients, design technicians, engineers and must possess excellent communication skills.

Responsibilities

As a Project Coordinator, you will:

- Actively seek and expand the current workload of Telecommunications companies throughout Ontario
- Lead a variety of projects for a multitude of clients with varying degrees of design and other requirements
- Create, maintain and implement reoccurring working relationships from both Telecommunications customers in the above noted area
- Assist the team with coaching and development of resources to ensure quality and drawing and design standards meets both the customer requirements as well as the local authority requirements.
- Attend site meetings with customers or third parties. Attend authority conducted utility coordination sessions and meetings; as required.
- Liaison with Municipal/Hydro/Other approving authorities for securing requirements and approvals to obtain entry for various Planview Utility Services Ltd customers to construct plant or infrastructure within the jurisdiction of said authority
- Assign tasks, budgets and provide support to internal resources for completion of designs. Manage and track budgetary and financial information and provide reports as requested to the division manager
- Review and implement quality control processes or documentation from resources to adhere to Planview Utility Services Ltd and third-party design requirements and standards.
- Responsible for ensuring key dates and benchmarks are met by internal and external resources to maintain critical project schedules and project completion deadlines for customers
- Responsible for maintaining overall project budgets, other costs and invoicing for multiple projects.
- The ongoing development of Planview USL's CAD processes, design standards and methodologies to further develop design and operational efficiencies
- Other activities as required.
