

CAD TECHNICIAN

Come work at a rapidly growing engineering firm that is staffed with industry experts, has great benefits, and prides itself on developing our people.

The Company

Planview Utility Services is an engineering firm that provides engineering design, sub-surface investigation and geographical information related services to telecommunication companies and electric utilities. Our workforce is a mix of veterans of the industry and youthful enthusiastic technical resources. We have pride in our collegial culture and host multiple regular corporate sponsored social activities. Our embrace of the use of technology plays a large part in our success.

The Position

We are currently seeking a qualified senior CAD Technicians for our growing team. This candidate will be responsible for the overall implementation of best practices, training, development and automation of CAD-based functions supporting a variety of projects across cross-functional teams. The selected candidate actively contributes to the project workload, focusing on complex and high profile assignments.

Responsibilities

- Responsible for the overall development, implementation and oversight of various CAD based standards and best practices for a variety of clients across several cross-functional and multi-disciplinary teams
- Ongoing development of automation processes, best practices and programming supporting workflow efficiencies within CAD based programs
- Creation of tool sets, templates and other resources to aide overall team in drafting and design
- On-going training of team members, responsible for the overall training protocol and programming for new resources
- Implement and manage metrics and benchmarks for drafting functions on projects with team members
- Contribute to the overall development of the quality assurance process
- Complex project assignments – drafting and design support on a variety of high-profile accounts. Execute with absolute quality and details
- Liaison with client technical resources on program/project expectations and project technical support
- Contribute to the technical component of resource evaluations as part of the hiring processes
- Other activities as required.
