

UTILITY INSPECTOR

Come work at a rapidly growing engineering firm that is staffed with industry experts, has great benefits, and prides itself on developing our people.

The Company

Planview Utility Services is an engineering firm that provides engineering design, sub-surface investigation and geographical information related services to telecommunication companies and electric utilities. Our workforce is a mix of veterans of the industry and youthful enthusiastic technical resources. We have pride in our collegial culture and host multiple regular corporate sponsored social activities. Our embrace of the use of technology plays a large part in our success.

The Position

Utility Inspector will be required to use their knowledge and experience to ensure construction methods are in compliance with standards, adherence to the engineering drawings, monitor scope changes, review third party permits, offer technical assistance, and complete topographic surveys for third-party companies on a variety of projects throughout Ontario. We are currently seeking to fill positions in Brockville, Perth, Kingston, and Peterborough.

Responsibilities

- Reports to the Program Manager
- Collects plant assets data including photos and GPS location of distribution facilities
- Preparation and translation of field work to supply finished product to the client
- Ensure compliance with our customers Construction Verification Program (CVP) requirements, specifications, standards, policies and design
- Provides quality assurance inspections and safety checks
- Prepare "Asbuilt mark up" drawings on installation of hydro plant installed by contractors to ensure compliance with the hydro standards, specifications and design
- Coordinates with other departments to ensure projects are completed safety and in compliance with established standards and procedures.
- Organize conductor isolation with the hydro utilities Line Department for contractors working in close proximity to existing energized hydro plant.
- Inspects vault rooms, three-phase pad-mount transformers, foundations, grounding, duct-banks for commercial and industrial projects
- Inspect transformer and switchgear terminations, primary and secondary cable splicing as required
- Responsible for a working knowledge and understanding of the appropriate safety legislation and EUSR rules
- Documenting field changes and review with clients to verify Change Order (CO) if required

Requirements

- College Diploma in Engineering Technology or equivalent past experience
- CET designation would be an asset
- Valid G license and clean driving abstract
