

# Natural Gas Services

## SAFE UTILITIES ARE SAFE COMMUNITIES

Damage prevention in the Natural Gas industry is critical to the health and safety of employees and the communities they serve.

Effective damage prevention solutions ensure reliable services for consumers, save billions in lost product, liability and property damages and greatly reduce harmful methane emissions that are up to 36 times more destructive than carbon dioxide.

Planview USL damage prevention solutions protect people, utilities and the environment.

## DAMAGE PREVENTION SOLUTIONS

- Locate Ticket Risk Scoring & Impact
- Automated Locate Ticket Clearing
- MultiViewer Utility Data Sharing Platform
- One Call/811 Mapping Support

## FIELD INSPECTION SERVICES

- Asset Condition Inspections
- Construction Verification
- Mobile LiDAR Collection & Processing
- Air Patrol

## GIS SERVICES

Accurate geospatial data is the cornerstone of successfully managing the critical infrastructure that transports natural gas to over 80% of all Canadian households each day.

Accelerate the digital transformation of your utility by creating a digital twin of your assets. Optimize workforce planning and equip teams with access to the data they need to make informed decisions. Extend the health and longevity of your assets with Planview's GIS services.

- GISaaS (GIS-as-a-Service)
- LaaS (Landbase-as-a-Service)
- 1View.works
- Digital Twin
- As-Built Updates
- GIS Migration
- GIS Consulting

## SUBSURFACE UTILITY ENGINEERING (SUE)

- SUE Quality Levels D, C, B & A
- Chamber Assessments
- GPR Scanning
- CCTV Inspections
- LiDAR Scanning
- Topographic Survey
- IR Scanning
